

Michael Frederikse

Michael Frederikse is a vice president and technology partner at Loomis, Sayles & Company. He is responsible for fulfilling all investment technology needs for the global fixed income, full discretion, emerging markets and systematic investment strategies teams. Additionally, Michael leads the artificial intelligence and machine learning group, where he develops tools, algorithms and strategies to complement the investment process for all teams at Loomis Sayles. He earned a BS from Brandeis University and has prior work experience in quantitative political science and data science, as well as high energy and particle physics.
