OCTOBER 2023

Investment Outlook

TOM FAHEY

Senior Global Macro Strategist,
Co-Director of Macro Strategies

We believe the US economy is late in the credit cycle as US Treasury bond yields move to highs not seen since 2007.

Mortgage rates have been forced higher and lending standards tighter, while oil prices have moved above \$90 per barrel and the US dollar has hit new highs for the year. These factors will continue to tighten financial conditions and help move inflation back toward the Federal Reserve's (Fed's) goal of 2.0%.

Will these late-cycle dynamics lead to a soft landing, no landing or a hard landing? So far, US markets do not seem close to pricing in a hard landing given resilient GDP growth in 2023, elevated equity prices and tight credit spreads. However, European GDP growth has stagnated close to zero for three quarters while China's economy remains mired in deflation as its property bust continues. Can the US remain an island of stability in an increasingly unstable global economy?

We will explore these credit cycle dynamics to provide insights as we start to look toward 2024.

Investment Themes:

KEY TAKEAWAYS

PAGE 3 Macro Drivers

We see the US economy late in the credit cycle with heightened risks of heading into a downturn, while Europe appears on the brink of a downturn and China in a downturn.

PAGE 4 Corporate Credit

The Fed currently estimates 2024 US GDP to be 1.5%. Given the "risk-on" environment year to date, we view credit spreads as tight and likely to widen over the next six to twelve months. In our view, growth expectations seem too high.

PAGE 5 Government Debt & Policy

Economic growth expectations in the US have increased, contributing to investors anticipating a "higher for longer" fed funds rate.

PAGE 6 Currencies

Downturn phases of the credit cycle are most often associated with the US dollar outperforming foreign currencies. Recently, we have seen that interest rates in many markets have moved in favor of the US dollar.

PAGE 7 Equities

Notably, the market seems to be expecting a robust rebound in earnings for 2024, close to 10%. We expect a much more challenging earnings environment.

PAGE 8 Potential Risks

Most asset valuations are reflecting a soft landing scenario already. Our core view is that the global economy is currently in a vulnerable position and therefore at risk of entering the downturn phase of the credit cycle.

PAGE 8 Asset Class Outlook

We are constructive on duration and neutral on credit. We would look to add growth equity exposure on weakness.

Macro Drivers

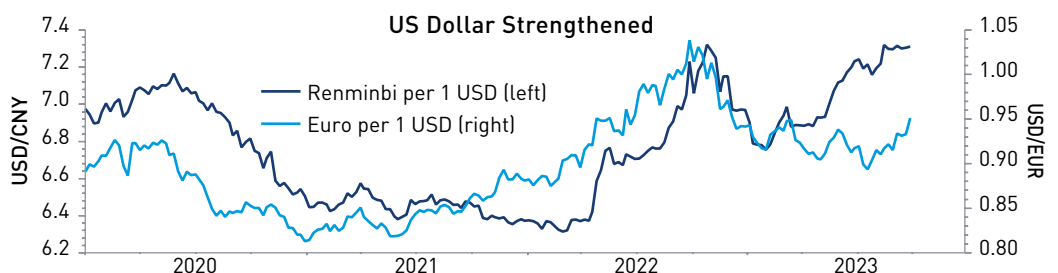

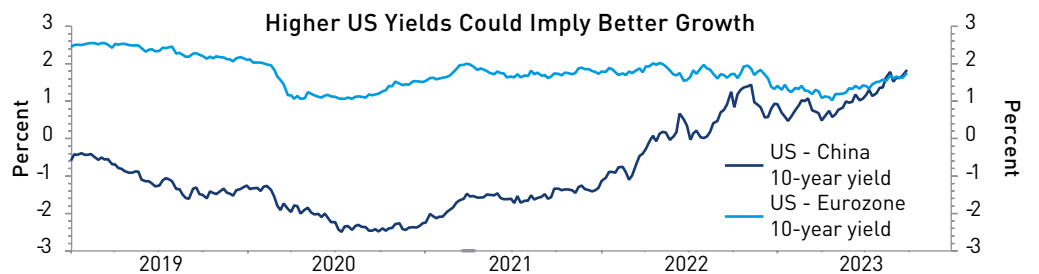

In our view, the shape of fiscal policy has been an important driver of where the major countries are currently in the global credit cycle. In terms of positioning, we see the US in late cycle with heightened risks of heading into a downturn, Europe on the brink of a downturn and China in a downturn.

- Fiscal policy has provided significant support for the US consumer and corporate sector since the COVID-19 pandemic. In addition, both sectors took advantage of super-low interest rates in 2020 and 2021. These moves provided them with insulation during the most aggressive tightening cycle by the Fed since the early 1980s, which has brought the fed funds upper bound to 5.5%.
- Bond yields spiked higher in the third quarter largely due to economic growth optimism and uncertainty about necessary Treasury issuance to fund the growing fiscal deficit. The Fed confirmed the growth optimism by revising higher its 2023 GDP estimate to 2.1%, up from 1.0% in June.
- Postpandemic, European fiscal policy was generally geared toward incentivizing a green energy transition. This policy may have a longer-lasting impact on the economy as it incentivizes long-run energy investments, but it lacked the near-term shock and awe of direct payments. We believe that was a factor as to why eurozone GDP has only grown 0.5% in the last year, compared to 2.5% in the US (as of 30 June 2023).
- Chinese fiscal policy postpandemic was more oriented toward company production supports. Consumers have been forced to save to make up for lost incomes, plus the property bust is having a major impact on tertiary consumer spending. China is currently in a deflationary environment with consumer price inflation essentially at zero, producer prices deflating by 3% in the last year, the People's Bank of China cutting interest rates, government bond yields declining in 2023 and continued devaluing of the renminbi.

US YIELDS MOVED HIGHER YEAR TO DATE BASED ON ECONOMIC GROWTH AND UNCERTAINTY SURROUNDING FUNDING THE FISCAL DEFICIT

The focus of Chinese and European fiscal policies did not result in higher yields relative to those of the US.

Corporate Credit

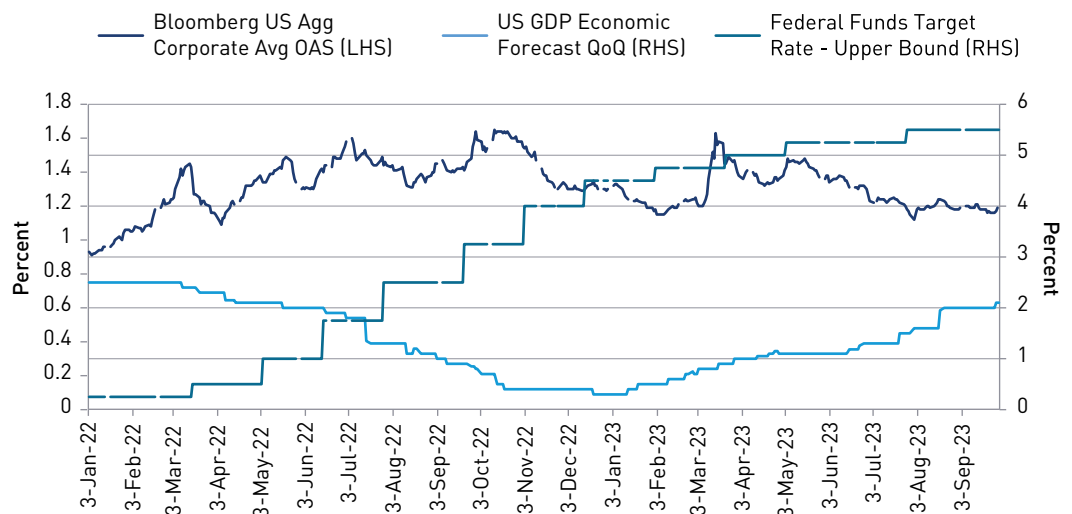

Despite the fed funds rate rising to an upper bound of 5.5%, GDP growth expectations for 2023 have steadily risen to 2.1%, which in our view has been a critical factor supporting riskier corporate credits.

- Credit spreads have tightened significantly during the past year. The US investment grade spread, represented by the Bloomberg US Aggregate Corporate Index average, peaked at 165 basis points (bps) on 12 October 2022, up from 116 bps as of 26 September 2023.
- As credit spreads to government bonds tightened, excess returns across the investment grade, high yield and bank loan sectors—in the US, Europe and emerging markets (EM)—were substantial.
- Looking back, when credit spreads peaked in October 2022, the Fed and other central banks were raising interest rates aggressively as economic growth expectations for 2023 were collapsing (see chart below). GDP growth expectations for 2023 collapsed to 0.4% by October 2022, very close to discounting an outright recession.
- So far, 2023 has been what we consider a “risk-on” environment with higher equity prices and tighter credit spreads. Even though S&P 500 earnings were negative for the past three quarters of 2023, they have not collapsed to the point where companies are shedding jobs, which typically heralds a downturn in the economy.
- We are watching 2024 GDP growth expectations closely. Bloomberg consensus estimates 0.9% for 2024 while the Fed currently estimates 1.5%. Currently, we would take the “under” on both those growth estimates. We view credit spreads as tight and likely to widen over the next six to twelve months. In our view, growth expectations seem too high as bond yields have surged, the US dollar has strengthened and energy prices have increased.

COUNTER TO EXPECTATIONS FOR 2023, AN ECONOMIC RECESSION DID NOT MATERIALIZE

When credit spreads peaked in October 2022 they coincided with a bottom in GDP growth expectations for 2023, setting up a risk-on environment.

Government Debt & Policy

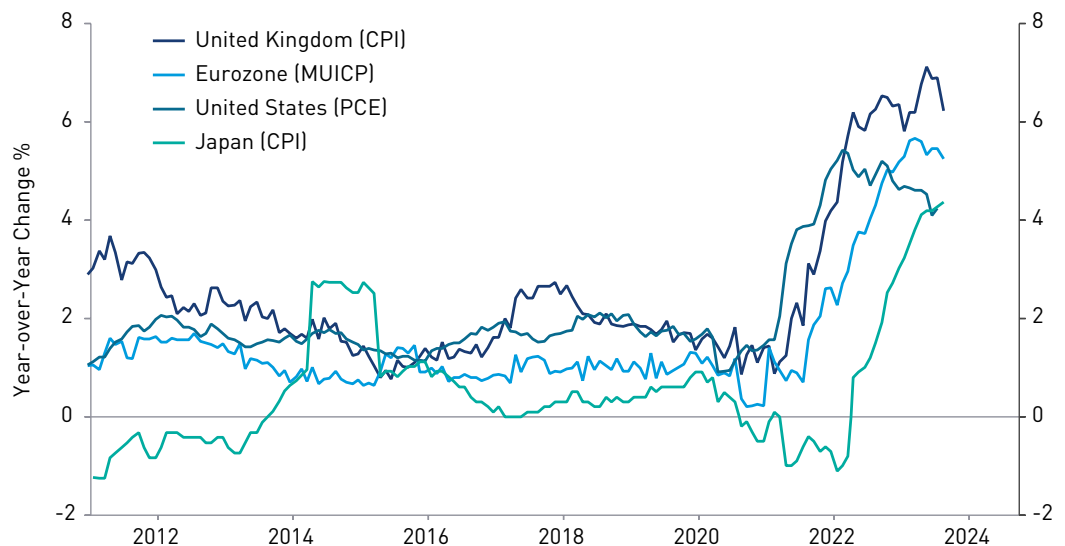

Economic growth expectations in the US have increased, contributing to investors anticipating a “higher for longer” fed funds rate.

- Current fed funds futures indicate only two cuts in 2024, compared to June 2023 when there were two cuts expected by the end of January 2024.
- Further bolstering the higher for longer view, the Fed’s September Summary of Economic Projections raised 2023 and 2024 GDP growth forecasts, suggesting little to no risk of an economic downturn. The Fed also lowered its unemployment projections from 4.6% to 4.1% for 2024, which is the long-run equilibrium level.
- The Fed’s September forecasts raised the median fed funds rate expected in 2024 from 4.6% to 5.1%.
- Large budget deficits coinciding with central banks reducing their government bond portfolios has led to much handwringing about who is going to purchase future Treasury supply.
- Globally, inflation remains far from the typical central bank’s target range of +/- 2.0%. In our view, this adds to a growing belief that we are entering a higher for longer interest rate environment.
- Higher yields tend to tighten monetary conditions even further. We think this will eventually soften economic momentum, bring inflation down and help interest rates and bond yields fall as we move into 2024.

GLOBALLY, INFLATION RATES CONTINUE TO BE HIGHER THAN CENTRAL BANKS’ PREFERRED TARGETS

Higher yields tend to tighten monetary conditions, which can undermine economic growth and slow inflation rates.

Source: LSEG Datastream, data as of 27 September 2023.

Information obtained from outside sources is believed to be correct, but Loomis Sayles cannot guarantee its accuracy. This material cannot be copied, reproduced or redistributed without authorization.

Currencies

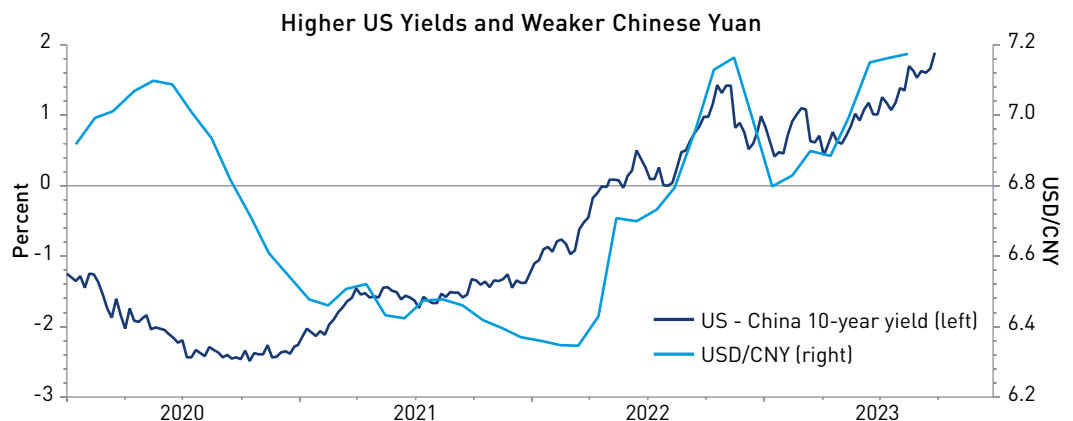

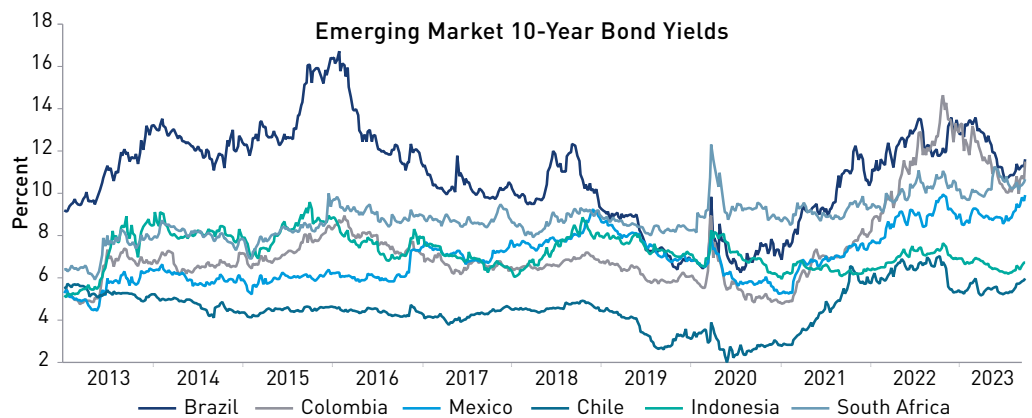

Downturn phases of the credit cycle are most often associated with the US dollar outperforming foreign currencies. We often remark that when bad things happen globally, the US dollar rallies.

- Interest rates in many markets have moved in favor of the dollar more recently. We have seen this in the spread of US yields over China's. The Chinese renminbi is an important anchor for many EM currencies and could be considered an important bellwether. The currency is an important tool for China to help escape deflationary pressures.
- While European gas prices have collapsed from their highs of €80 to €11 per megawatt hour in 2022, they are still above pre-pandemic levels, which averaged around €6 per megawatt hour. An energy shock in Europe would likely be a negative trade shock relative to the US, which could add downward pressure on the euro as we move into 2024.
- Many EM countries currently have much higher interest rates compared to those of the US. We believe that should support their currencies in 2024, even if a global downturn occurs. Once inflation comes under control, the Fed and other central banks could be positioned to cut rates.

EMERGING MARKET COUNTRIES ARE CURRENTLY POSTING HIGHER RATES RELATIVE TO THAT OF THE US

The Chinese renminbi is an important anchor for many EM currencies and could be considered an important bellwether.

Source: LSEG Datastream, data as of 27 September 2023.

This material is for informational purposes only and should not be construed as investment advice. Information obtained from outside sources is believed to be correct, but Loomis Sayles cannot guarantee its accuracy. Past market experience is no guarantee of future results.

Equities

Notably, the market seems to be expecting a robust rebound in earnings for 2024, close to 10%. We expect a much more challenging earnings environment.

- Recent corrections in equity markets are coinciding with moves higher in bond yields, which in our view is not surprising as discounted cash flows decline with higher yields.
- Corporations have been losing pricing power and economic growth appears set to continue slowing. We believe top-line growth will be tougher to generate and we suspect further profit margin compression is ahead.
- Within the S&P 500, there is currently a huge divergence between the top-performing stocks and the rest. For example, year to date through 25 September, the equal-weighted S&P 500 Index returned 2.0%, versus 18% for the capitalization-weighted S&P 500 Index. Most stocks are seeing marginal performance in 2023.
- Equity market performance needs to broaden to include small-cap companies and less-defensive sectors, in our opinion. However, even if this were to occur, we would be reluctant to fully embrace such a trend at this late stage of the credit cycle.

Any opinions or forecasts contained herein reflect the current subjective judgments and assumptions of the Macro Strategies team only, and do not necessarily reflect the views of Loomis, Sayles & Company, L.P. This information is subject to change at any time without notice. This material is for informational purposes only and should not be construed as investment advice. Information obtained from outside sources is believed to be correct, but Loomis Sayles cannot guarantee its accuracy. This material cannot be copied, reproduced or redistributed without authorization.

Potential Risks

In our view, a cautious asset allocation stance with a tilt toward fixed income is warranted given macroeconomic headwinds and a corporate profits recession appearing to take hold.

- Currently, our core view is that the global economy is in a vulnerable position and therefore at risk of entering the downturn phase of the credit cycle.
- Most asset valuations are reflecting a soft landing scenario already. We believe the probability of a soft landing is around 20% and therefore find markets optimistically priced.
- We anticipate a profits recession in the intermediate term. That said, corporations could find a way to manage through challenges and continue growing earnings despite economic weakness and higher interest rates.
- Inherent in a downturn scenario is a rising unemployment rate. If US unemployment doesn't head above 4.0%, then a soft landing could become the base case.
- Market performance suggests conditions are rosy. We are more cautious.

Asset Class Outlook

We are constructive on duration and neutral on credit. We would look to add growth equity exposure on weakness.

Third Quarter Review

INDEX RETURNS BY SECTOR

as of 30 September 2023

INDEX				
US BROAD MARKET	1 MONTH	3 MONTH	6 MONTH	1 YEAR
BBG US AGGREGATE BOND	-2.54	-3.23	-4.05	0.64
BBG US GOVERNMENT/CREDIT	-2.34	-3.00	-3.90	0.93

The broad fixed income market experienced a second consecutive quarter of negative returns, largely attributable to the hawkish tone set during the September Fed meeting and the growing consensus of higher-for-longer interest rates. In Q3, we saw two favorable core CPI reports where inflation trended lower, however, those alone were not enough to deter the Fed from its hawkish stance.

US GOVERNMENTS	1 MONTH	3 MONTH	6 MONTH	1 YEAR
BBG US TREASURYS	-2.21	-3.06	-4.40	-0.81
3-MONTH T-BILLS	0.44	1.33	2.57	4.65
2-YEAR TREASURY	-0.08	0.57	-0.32	1.65
5-YEAR TREASURY	-1.24	-1.20	-2.87	0.61
10-YEAR TREASURY	-3.46	-5.12	-6.93	-2.82
30-YEAR TREASURY	-7.60	-12.72	-14.78	-12.05
BBG US TIPS	-1.85	-2.60	-3.98	1.25
BBG US AGENCY	-0.62	-0.24	-0.68	2.10

US Treasuries sold off to varying degrees this quarter based on duration. While the entire yield curve saw an upward shift, the long end rose significantly more than the short end. Long duration Treasury performance suffered as a result.

US MUNICIPALS	1 MONTH	3 MONTH	6 MONTH	1 YEAR
BBG US MUNICIPALS	-2.93	-3.95	-4.05	2.66

Municipal bonds saw negative returns this quarter due largely to the prevailing interest rate environment. Munis underperformed Treasuries as challenges in the commercial real estate market persisted. The muted transit recovery and the ongoing work from home phenomenon continued to disrupt business districts.

Data Sources: Bloomberg indices from Bloomberg Live; currency returns, JPMorgan and Citigroup indices from Bloomberg; bank loans from S&P Global Market Intelligence.

All returns in US dollars, unless noted.

Past performance is no guarantee of future results.

US SECURITIZED	1 MONTH	3 MONTH	6 MONTH	1 YEAR
BBG MBS	-3.19	-4.05	-4.67	-0.17
BBG ABS	-0.43	0.25	0.13	2.81
BBG CMBS	-1.19	-1.02	-1.62	1.19

The securitized market produced positive returns in ABS, but experienced negative returns in both MBS and CMBS during the quarter. Underperformance in the MBS market can be attributed to its longer duration, whereas the ABS market outperformed due to its shorter duration.

**INDEX RETURNS
BY SECTOR**
as of 30 September 2023

INDEX				
CORPORATES	1 MONTH	3 MONTH	6 MONTH	1 YEAR
BBG US INVESTMENT GRADE	-2.67	-3.09	-3.37	3.65
AAA	-4.40	-6.31	-7.23	-0.07
AA	-3.21	-4.25	-4.92	1.60
A	-2.73	-3.24	-3.63	2.85
BBB	-2.50	-2.71	-2.80	4.77
BBG EUROPEAN INVESTMENT GRADE -LOCAL CURRENCY RETURNS	-0.86	0.34	0.77	3.65
AAA	-2.20	-1.10	-0.22	1.28
AA	-0.92	0.06	-0.01	1.49
A	-0.98	0.14	0.39	2.83
BBB	-0.74	0.55	1.20	4.63
BBG STERLING INVESTMENT GRADE -LOCAL CURRENCY RETURNS	0.04	2.21	-1.28	8.11
AAA	-0.72	0.62	-3.44	1.64
AA	-0.07	1.72	-2.43	5.09
A	-0.08	1.86	-1.90	7.17
BBB	0.18	2.64	-0.52	9.54

Across Europe and the US, lower-quality bonds outperformed their higher-quality counterparts. This aligns with the fact that higher-quality bonds generally have longer duration and duration underperformed this quarter. Sterling corporates outperformed other developed markets in Q3. European markets experienced modest gains, while US-domiciled bonds underperformed across the board.

CORPORATES	1 MONTH	3 MONTH	6 MONTH	1 YEAR
BBG US HIGH YIELD	-1.18	0.46	2.21	10.28
BB	-1.41	-0.39	0.49	8.42
B	-1.03	0.84	2.76	11.57
CCC	-0.79	2.51	6.80	12.66
BBG PAN-EURO HIGH YIELD -LOCAL CURRENCY RETURNS	0.29	1.88	3.76	11.78
BB	-0.08	1.33	3.02	10.70
B	0.35	2.70	5.28	14.81
CCC	3.82	3.78	5.75	10.12

US high yield bonds outperformed their investment grade counterparts, whereas European high yield bonds lagged behind investment grade securities. Consistent with investment grade corporates, both US and European high yield markets saw lower-quality names outperform during the quarter.

Data Sources: Bloomberg indices from Bloomberg Live; currency returns, JPMorgan and Citigroup indices from Bloomberg; bank loans from S&P Global Market Intelligence.

All returns in US dollars, unless noted.

Past performance is no guarantee of future results.

**INDEX RETURNS
BY SECTOR**
as of 30 September 2023

INDEX		1 MONTH	3 MONTH	6 MONTH	1 YEAR
BANK LOANS					
MORNINGSTAR LSTA US LEVERAGED LOAN		0.96	3.46	6.72	13.05
	BB	0.63	2.21	5.09	11.36
	B	1.06	3.85	7.22	14.31
	CCC	1.59	6.05	10.70	12.46

Bank loans performed well in Q3. Bank loans typically have floating coupons that adjust with the market rate, resulting in lower duration. Given the significant increase in interest rates over the past quarter, bank loans continued to benefit from upward adjustments on floating coupons.

DEVELOPED COUNTRIES	1 MONTH	3 MONTH	6 MONTH	1 YEAR
CITIGROUP WGBI -LOCAL CURRENCY RETURNS	-2.01	-2.71	-3.42	-1.26
CITIGROUP NON-USD WGBI	-1.87	-2.46	-2.72	-1.66
UNITED STATES	-2.20	-3.04	-4.36	-0.78
CANADA	-2.35	-3.56	-4.98	-2.31
JAPAN	-0.90	-4.28	-3.79	-3.10
AUSTRALIA	-2.35	-1.34	-5.33	-0.04
UNITED KINGDOM	-1.22	-1.06	-7.22	-3.55
EUROPEAN GBI	-2.69	-2.53	-2.49	-2.22
FRANCE	-2.54	-2.46	-2.63	-3.06
GERMANY	-2.36	-2.37	-2.72	-3.71
IRELAND	-2.48	-2.50	-2.49	-2.92
ITALY	-3.22	-2.71	-1.87	0.98
SPAIN	-2.44	-2.20	-2.41	-2.15

All countries within the Citigroup World Government Bond Index (WGBI) posted losses in the third quarter. Higher interest rates have been casting a shadow over the overall global outlook.

EMERGING MARKET BONDS	1 MONTH	3 MONTH	6 MONTH	1 YEAR
JP MORGAN EMBIG -SOVEREIGN/QUASI-SOVEREIGN, USD	-2.81	-2.63	-1.14	8.61

	GROWTH	-7.32	9.59	1.08	1.55
	VALUE	-2.96	7.84	13.28	2.58

The US equities market experienced negative returns this quarter. Large-cap equities, represented by the Russell 1000 Index, displayed relatively stronger performance compared to mid- and small-cap equities. Within mid- and small-cap equities, growth stocks were more negatively impacted by rates than value stocks.

Data Source: FactSet. All returns quoted in US dollars. Performance for one- and multi-year periods is annualized. Sorted by index quarterly returns. Due to rounding, sector totals may not equal 100%.

Index Definitions

Bloomberg US Aggregate Bond Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the US investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis.

Bloomberg US Government/Credit Index includes securities in the government and credit indices. The government index includes treasuries -i.e., public obligations of the US Treasury that have remaining maturities of more than one year and agencies -i.e., publicly issued debt of US Government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the US Government. The credit index includes publicly issued US corporate and foreign debentures and secured notes that meet specified maturity, liquidity, and quality requirements.

Bloomberg US Treasury Index includes public obligations of the US Treasury with at least one year until final maturity, excluding certain special issues such as state and local government series bonds -SLGs, US Treasury TIPS and STRIPS.

Bloomberg US Treasury Inflation Protected Securities Index consists of inflation-protection securities issued by the US Treasury that have at least one year to maturity and at least \$250 million par amount outstanding.

Bloomberg US Agency Index includes agency securities that are publicly issued by US Government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the US Government -such as USAID securities.

Bloomberg US Municipal Index is a rules-based, market-value-weighted index engineered for the long-term tax-exempt bond market. The index has four main sectors: general obligation bonds, revenue bonds, insured bonds -including all insured bonds with a Aaa/AAA rating, and prerefunded bonds.

Bloomberg Mortgage-Backed Securities -MBS Index is a component of the Bloomberg Aggregate Index covering mortgage-backed pass-through securities of Ginnie Mae -GNMA, Fannie Mae -FNMA and Freddie Mac -FHLMC.

The MBS Index is formed by grouping the universe of over 600,000 individual fixed rate MBS pools into approximately 3,500 generic aggregates.

Bloomberg Asset-Backed Securities -ABS Index is a component of the Bloomberg US Aggregate Index including pass-through, bullet and controlled amortization structures. The ABS Index includes only the senior class of each ABS issue and the ERISA-eligible B and C tranche. Constituents must have an average life of at least one year and a deal size of at least 500 million.

Bloomberg Commercial Mortgage-Backed Securities -CMBS ERISA-Eligible Index is a component of the Bloomberg US Aggregate Index and the ERISA-eligible component of the Bloomberg CMBS Index. This index, which includes investment grade securities that are ERISA eligible under the underwriter's exemption, is the only CMBS sector that is included in the US Aggregate Index.

Bloomberg US Corporate Index contains publicly issued US corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity and quality requirements. To qualify, bonds must be SEC-registered. The index includes both corporate and non-corporate sectors. The corporate sectors are Industrial, Utility, and Finance, which include both US and non-US corporations. The non-corporate sectors are Sovereign, Supranational, Foreign Agency, and Foreign Local Government.

Bloomberg Euro-Aggregate Corporate Index consists of bonds issued in the euro or the legacy currencies of the 16 sovereign countries participating in the European Monetary Union -EMU. All issues must be investment grade-rated, fixed-rate securities with at least one year remaining to maturity. The Euro-Aggregate Index excludes convertible securities, floating rate notes, perpetual notes, warrants, linked bonds, and structured products.

Bloomberg Sterling Aggregate Corporate Index is a broad-based benchmark that measures the investment grade, fixed-rate, taxable, corporate sterling-denominated bond market. Inclusion is based on the currency of the issue, not the domicile of the issuer. The index includes publically issued securities from industrial, utility, and financial companies that meet specified maturity, liquidity and quality requirements.

Bloomberg US Corporate High-Yield Index covers the universe of fixed rate, non-investment grade debt. Eurobonds and debt issues from countries designated as emerging markets -sovereign rating of Baa1/BBB+/BBB+ and below using the middle of Moody's, S&P, and Fitch are excluded, but Canadian and global bonds -SEC registered of issuers in non-EMG countries are included. Original issue zeroes, step-up coupon structures, 144-As and pay-in-kind bonds -PIKs, as of October 1, 2009 are also included.

Bloomberg Pan-European High-Yield Index covers the universe of fixed-rate, sub-investment grade debt denominated in euros or other European currencies -except Swiss francs. Securities must be rated high-yield -Ba1/BB+ or lower by at least two of the following rating agencies: Moody's, S&P, Fitch. Excludes emerging markets.

Morningstar LSTA US Leveraged Loan Index, is a market value-weighted index designed to measure the performance of the US leveraged loan market based upon market weightings, spreads and interest payments.

Citigroup World Government Bond Index -WGBI measures the performance of fixed-rate, local currency, investment grade sovereign bonds. The WGBI is a widely used benchmark that currently comprises sovereign debt from over 20 countries, denominated in a variety of currencies. The WGBI provides a broad benchmark for the global sovereign fixed income market.

JPMorgan Emerging Markets Bond Index Global -EMBIG tracks total returns for US dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities: Brady bonds, loans, Eurobonds.

JPMorgan Corporate Emerging Markets Bond Index -CEMBI Broad Diversified tracks total returns of US dollar-denominated debt instruments issued by corporate entities in emerging markets countries. The CEMBI Broad is the most comprehensive corporate benchmark followed by the CEMBI, which consists of an investable universe of corporate bonds.
